

## Logbot OS recovery procedure

- 1) Install the image recovery software balenaEtcher on your PC (Windows 7/10)  
Download link:  
<https://github.com/balena-io/etcher/releases/download/v1.5.117/balenaEtcher-Portable-1.5.117.exe>
- 2) Download the LogbotOS image:
  - a) For IOT2040: <https://logbot.cloud/docs> -> Restore LogbotOS SD -> IOT2040 Image
  - b) For IOT2050: <https://logbot.cloud/docs> -> Restore LogbotOS SD -> IOT2050 Image
- 3) Insert the microSD card in the adapter and then in the PC slot
- 4) Run balenaEtcher and select the image

- 5) Select the target (microSD card)

- 6) Proceed flashing the image and wait for it to complete the process

- 7) Insert the microSD in the IoT gateway, boot the device and configure it
